LOCAL ITEMS

Mr. and Mrs. W. Meade, who
have been spending the winter at
Bellevue, Alberta, returned last
Thursday.

Neil McLean was a visitor in
Edmonton over the week-end.

Jim Wilkinson, of Rollinson
district, returned last week from
the States.

The Mid-night Serenaders will
make their second appearance in
the Chinook School on Friday,
April 1st at a Novelty ball. Don't
fail to attend this function. Good
time for all.

Mrs. E. E. Jacques left on Fri-
day for Calgary, where she will
visit her father who is seriously ill.

William Young, of Divide,
Sask., arrived in Chinook on Sat-
urday morning with a car load of
settler's effects. Mr. Young will
farm his father's place west of
town.

Miss Elsie Peterson returned
on Saturday from Minnesota,
where she has been visiting her
sister, Mrs. Dahl.

Mr. and Mrs. M. L. Chapman
entertained a number of young
people last Friday evening in
honor of Miss S. Chisholm who
left on Wednesday morning for
the East.

A new low price has been set
on Mr. Bird's homestead the N.E.
quarter of Section 13-28-7. This
splendid homestead can be pur-
chased, clear of all encumbrances,
for \$2.00 per acre. Apply at the
Advance Office.

Frank Sayers returned on Sat-
urday from Chatham, Ont., where
he has been spending the past
two months.

Mrs. S. Y. Hoppin, Milliner, of
Kindersley, will be at Hurley's
store on Thursday, April 7, with
a complete line of Ladies', Misses'
and Children's hats.

Percy Dobson, of Rockyford,
was a visitor in Chinook last
Thursday.

The Chinook Women's Institute
will meet at the home of Mrs. W.
Hurley on Wednesday afternoon,
April 6, at 3 p.m. Roll call—
"Your favorite flower, and why?"

Mrs. A. McAlister and family
left on Wednesday for Calgary,
where they will reside.

To-date 190,000 bushels of
wheat have been shipped from
Chinook this year. It is estimated
that there is 30,000 bushels of
wheat still in the district.

Charley Busque, of Rearville,
left on Wednesday for Edmonton,
where he will receive medical
treatment.

Mrs. C. W. Barton left on Wed-
nesday for Cereal, where she will
visit friends.

L. S. Dawson is in Calgary this
week attending the Alberta Muni-
cipal Secretaries' Convention.

Meeting of Village Council

A meeting of the Council of the
Village of Chinook was held in the
Secretary's office on Saturday even-
ing. All members were present.

The mill rate for the current
year was set at 30 mills, and the
Business tax will be 5 per cent. of
the rental value.

The license fees for Restaurants,
Pool Hall, Liveries and Laundries
will be the same as last year.

The following are the estimates
for the year:

Receipts—	
Municipal tax	\$1400.00
License fees	125.00
Business tax	347.00
Total	\$1,872.00

Expenditures—	
Sidewalks	\$550.00
Streets	250.00
Lights	20.00
Health	100.00
Water	100.00
Salaries	200.00
Sundries	100.00
Total	\$1500.00

It was decided that Lots for
which tax titles have been obtained
during 1926 be advertised for sale
in the Alberta Gazette.

That a rental of \$1.00 per annum
be charged for village lots for gar-
dens.

Mrs. S. Nelson was appointed
auditor for 1927, at a salary of \$10.

The regular meeting of the
Council will be held on the first
Saturday of each month.

A number of accounts were
passed and ordered to be paid.

The next meeting of the Council
will be held on Saturday, May 7.

Construction of Rosedale Branch To Be Delayed

OTTAWA, March 25—The rail-
ways, canals and telegraphs com-
mittee of the house of commons
today reported a bill extending
until August, 1927, the time
allowed for the construction of the
Rosedale-Bull Point branch line
in Alberta. The construction
authorized will be completed jointly
by the Canadian National and
Canadian Pacific railways, a joint
agreement between the railways
having been completed.

Butt's Rink Wins In Novelty 'Spiel'

The novelty bonspiel, which cre-
ated much interest in Chinook dur-
ing the past week, was finished on
Thursday evening when Butts de-
feated Harry Smith's rink in the
finals. The following are the win-
ning rinks:

1. H. W. Butts (skip), Mrs. P.
Peterson, C. Neff, Mrs. J. Cooley.
2. Harry Smith (skip), May
Todd, O. Mielke, D. Bell.
3. W. Lee (skip), Mrs. Hurley,
D. Stewart, L. Cooley.
4. M. L. Chapman (skip), Mrs. F.
Tracy, O. Nelson, Mrs. Butts.

New Settlers in District

According to figures obtained
from the local station agent, Mr
O. B. Elliott, about fifty new set-
tlers have arrived in Chinook this
year. The new comers have all
been located on farms in the dis-
trict.

Co-Operation

Since the year 1901, when a small group of farmers under the leadership of W. R. Mather, now Dominion Minister of Agriculture, met in the town of Indian Head and organized the Territorial Grain Growers' Association, the plan of applying the principles of co-operation to the solution of problems peculiar to the West has been increasing year by year. People and governments until today, it has come to be recognized as the most effective means of righting many wrongs and removing grievances from which the great army of producer-sufferers.

At the beginning of the present century people were inclined to look to Government ownership as the only way out of the economic difficulties with which they were confronted. The most serious problems were in relation to the marketing of grain, and the first great achievement of the Territorial Grain Growers' Association was securing the passage of the Canadian Grain Act, with its heading platform feature, which had the effect of breaking the old elevator monopoly.

This in itself was most influential, and an agitation was begun for Government owned and operated grain elevators. This was given a trial in Manitoba, but was rejected in Saskatchewan in favor of a system of co-operative elevators, owned and operated by the farmers themselves through a joint stock company backed with financial guarantees by the Government. The Government owned system in Manitoba was not a success, and the elevators there were soon leased to a farmers' organization. The Saskatchewan Co-operative Elevator Co. was a huge success and in a comparatively few years became the greatest grain handling concern in the world.

From that time onward co-operation became a word to conjure with throughout Western Canada. Co-operative creameries, co-operative stockyards, co-operative hall insurance, co-operative wheat growers' associations, quickly followed. The Grain Growers' Association was duplicated in Manitoba and Alberta and spread to Ontario. Their forces were then united in the Canadian Council of Agriculture. Co-operation brought unity and in unity the producers of the West found strength.

There yet remained one great weakness in the economic condition of the West. The increasingly large grain crops of the country were dumped on the market at one time, glutting it, breaking prices below a profitable level to the producer. The seemingly impossible task of uniting the farmers in one great co-operative enterprise to handle all the wheat and to market it in an orderly and profitable manner was undertaken through the organization of Wheat Pools. It succeeded, and the Provincial Pools organized one central selling agency. The result is common knowledge today, and the wheat pools have been followed by Cattle Grain Pools, Egg and Poultry pools, Livestock pools, Dairy pools.

Truly enormous as have been the material gains to the producers of the West through this general acceptance of the principles of co-operation, resulting, as it has, in more orderly marketing, more orderly financing, in greater convenience all round, it is not altogether wise of the public to say that even more significant and permanent efforts have resulted.

The underlying principle of co-operation is that the strong shall help the weak, and that in the nation of all still greater strength will be found. No member of a wheat pool, however large his resources, regardless of the size of his crop, irrespective of his financial strength, will realize the top price for his grain, and, equally so, no member however poor he may be, or small the quantity of his crop to market, will be forced to accept the lowest price. Strong and weak, rich or poor in resources, each one every member will receive the average price. In other words, some make sacrifices for the good of the many. But, in the long run, even those who seemingly do sacrifice, something are the winners because through control of the aggregate large volume of the many small producers the pool brings strong to profit and to all.

Whether it is fully realized or not by the vastest co-operative body and action, the fact remains that the development of this spirit of co-operation, and the application of co-operative principles to the everyday business of the farm, a great work of good citizenship is being performed. An educational and an uplifting importance is being meted out.

Tens of thousands of men and women banded together to achieve purely material benefits find it necessary to sink all differences of race, of creed, of political faith, and to disregard varying conditions in life. They find commonplaces necessary; that there must be a spirit of give and take. They make the happy discovery of each other's good qualities. Living in an atmosphere of co-operation for material gains, they unconsciously cultivate the idea, it begins to enter their thought and permeate their lives. They find it impossible it must display itself in unmaterial and school district administration. It influences church affairs, it becomes a habit, an environment affecting all community life and activities. In a word, it reflects itself in world-wide citizenship.

And the youth of today is being brought up in this atmosphere of co-operation. It is influencing the whole thought and outlook of the boys and girls of this generation, broadening their sympathies, teaching them to work together for the common good instead of at cross purposes, developing a new sense and a finer ideal of citizenship.

May Prolong Life Span

Will Not Tour Dominion

Prince Intends Going Direct to Ranch From Ottawa

That the Prince of Wales would not make a general tour of the country on his next visit to Canada, but proceed direct to Ottawa and thence to his ranch in Alberta, was the statement made by Prof. W. Carlyle, manager of the prince's ranch, who arrived at St. John on the steamship, Montclair. While nothing definitely had been settled, the Prince, accompanied by Premier Stanley Baldwin would probably arrive in Canada next August, the professor said.

Professor Carlyle had been on a regular visit to England to confer with the Prince on matters pertaining to the ranch.

The advisability of importing additional stock for the ranch was discussed but nothing decided as it was impossible to export cattle from England at the present time owing to the foot and mouth disease there.

First News In Fifteen Years

Slav Islanders Have Just Heard of Czars Overthrow

News of the overthrow of the Czars and the establishment of a Soviet government in Russia has just reached a large island in the Bering Strait between Siberia and Alaska, with the arrival of the first ship in fifteen years. The Slav and Eskimo residents of the island were much astonished to learn that Russia is no longer a monarchy.

Great Canadian Remedy Helped Him Like Magic

Saskatchewan Man Used Dodd's Kidney Pills

Mr. A. M. Pacholko Who Suffered From Backache Tells of Relief He Found and Found

Jedburg, Sask. (Special).—Every corner of Canada holds at least one person who has found relief by taking Dodd's Kidney Pills. They have been relieving kidney troubles all over this vast Dominion for more than thirty-five years. They relieve kidney trouble and those diseases that spring from disordered kidneys. That's why they are so popular today. Read what Mr. A. M. Pacholko says about them: "I have suffered from backache for a long time and have tried different liniments, plasters, etc., and found no benefit. Finally I tried Dodd's Kidney Pills which helped me like magic. I also found them good for that tired feeling."

Dodd's Kidney Pills have become a family remedy because people have tried them and found the good they help Rheumatism, Lumbago, Lame Back, Urinary Disease and Urinary troubles, because all of these are either kidney diseases or are caused by the kidneys failing to do their work.

Canada's Timberland

Of the total area of Canada, 1,200,000 square miles approximately one quarter of the whole is forest land. Less than half of this carries timber of merchantable size (6 inches in diameter) at the present time, and only about one quarter carries saw material (10 inches in diameter).

To Asthma Sufferers, Dr. J. D. Kellogg's Asthma Remedy comes like a helping hand to a sinking swimmer. It gives no relief, but, something he has come to believe impossible. Its benefit is too evident to be questioned. It is his own best advertisement. He can best advertise it. He suffers from asthma and this remedy has helped him and helped him to sleep.

Within fourteen miles of London, the Kentish village of Doonham has neither gas nor electricity, no sewer, no doctor, no chemist, no bus or street car.

A Blessing to People of Advanced Years

Gin Pills relieve sufferers from kidney and bladder trouble

"I wonder if you really know what a blessing Gin Pills are to people of advanced years. "I am 72 years of age, and suffered for a considerable time with kidney and bladder trouble. My rest was broken through having to get up in the night three or four times. Later I suffered with pain in the bladder, and my urine was bad and Gin Pills for me. In the fact, and I bought a box of Gin Pills. Before I had finished it I was relieved of the pain in my bladder and had to get up less frequently. My urine is now much better and I am permanently free from trouble of this kind. But, if you are in doubt, others the relief they have given me, they will be a living proof of it." (Name on request.)

Prompt and lasting relief has been found in Gin Pills by thousands of people of advanced years who have had kidney or bladder trouble. It even slightly troubled in this way, get a box today at your druggist's—50c. National Drug & Chemical Company of Canada, Limited, Toronto, Canada.

Use it Wherever the Recipe **Borden's ST. CHARLES** **Calls for Milk**

Growth of Power Development

Quarter of Million Horse-Power Being Developed on Winnipeg River

By the close of the present year plants with a capacity of over a quarter of a million horse power of hydro-electric energy will be installed on the Winnipeg River, Manitoba—a remarkable growth in twenty years. When the river is fully developed about three times this amount of power will be available, so that the city of Winnipeg and district can hope to enjoy the advantages of low-cost power for some time to come before the market having absorbed all the power available on its river will have to seek further abroad to increase its energy supply.

The silent teamwork of the last three years' progress and the expansion of the application of Winnipeg River power from an almost purely urban market to large industrial and utility industries, the cooperation of finally competing interests, and the remarkable growth of the power market in the rural districts.

A GREAT PUZZLE TO CAREFUL PARENTS

One of the greatest puzzles to the careful parent is to know what medicine to give the little ones. When the child falls ill with griping pains; is seized with cold or fever, refuses food or vomits what he has taken, when he cries a great deal and can not get the sleep so necessary to the growing child, the parent is in a quandary. What is to be done on such occasions? As often as not there is not a suitable medicine in the house. The puzzle is what to give him to get him right quickly.

It is to meet such emergencies that Baby's Own Tablets were devised. These pleasant little Tablets quickly relieve fever, break up colds, relieve constipation and indigestion and allow restless infants. They quiet the nerves and promote restful, healthy sleeping. They are guaranteed absolutely harmless and safe for even the youngest and most delicate baby.

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Alberta Is the Corn Belt

The Province of Alberta is definitely in the corn belt of North America, says a report from the Provincial Government. Although a few years ago it was producing very little corn, this has now come to be a notable part in the annual agricultural production. Last year more than \$1,000,000 worth was produced, mainly in the southern part, and the corn exhibits were favorably commented on at various seed grain fairs.

Indians Need No Boundaries

The aborigines of the continent know no boundary lines and may pass in and from the United States, with out let or hindrance. Federal Judge Dickinson has ruled at Philadelphia. The ruling was given in the test case of Paul Dingo of the Coughswagon reservation of Montana. Dingo was deported to Canada last March on a charge of illegal entry into the United States.

Only one stone is harder than the transparent wall dissolved, according to "Liberty." It is the black diamond which is so hard that it cannot be polished.

Minard's Liniment soothes tired feet.

Boy Immigration Scheme

Federal Government Co-Operating With the Provinces by Lending Financial Assistance

Reports reaching the Immigration Department from Manitoba indicate that Premier Bracken is favorably impressed with the boy immigration scheme, and will join the province with the Federal Department. The scheme is that the Federal Department brings out the boys and makes a grant of \$9 per head to sustain them during an instruction period when they are on the farm. The farm is to be provided by the Provincial Government, Ontario and the Maritime Provinces have already come into the scheme and more than 1,000 boys will be brought out from England this year. The Manitoba Government, it is learned, already possesses a large farm which could be used for this scheme. It is located in the Birds district.

Alberta Hen Wins Out

Performs Best Laying Record at Contest Held Down in Georgia

Amongst a thousand competitors from many sections of the United States, a hen owned by A. M. Dykes, of the Winter Egg Poultry Farm, Leedsville, secured the best laying record of the International Egg Laying Contest, recently conducted by the State College of Agriculture at Athens, Georgia.

Dykes' hen was declared the best individual egg layer and accordingly won the silver cup put up for competition by the college. This hen secured 162 points out of a possible 120.

HAD BAD SPELLS WITH HER HEART

Mrs. R. G. Hall, Bolton Centre, Que., writes:—"Some time ago I had bad spells with my heart which I believe was caused by nervousness. I tried everything I could think of, but could get no relief until one of my friends persuaded me to get a box of

MILBURN'S HEART NERVE PILLS After I had taken a few boxes I got wonderful relief. I now weigh one hundred and thirty-five pounds where, before, I never went over ninety." Price 50c. a box at all druggists or dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

The Gloomy Bolshevik

Visitors Are Struck by Depression and Dejection of People in Russia

The Bolshevik, railroad is a gloomy, dismal, morbid creature, and recent visitors to Russia are struck with the utter depression and dejection of the hapless people who are doomed to exist there because for them there is no escape. Russia is in a state of an even more stretched place than it was in the past. It is represented in the Russian novel of the Central Russia where everyone is depicted as plunged in gloomy melancholy.

Canada's National Parks

Canada has now 100,000 square miles of the most magnificent scenery in the Dominion set apart as national recreation areas. Few countries in the world have made such generous provision for outdoor recreation and pleasure.

Let us pause for a moment to shed a tear over the sad fate of the misguided immigrant who gave his wife a box of post typewriter for her birthday.

BAYER **Genuine ASPIRIN** Proved safe by millions and prescribed by physicians for Colds Headaches Neuritis Lumbago Pain Neuralgia Toothache Rheumatism

Reindeer for the North

May Move Reindeer From Alaska to Canada for Food Supply for Natives

The Porcupine brothers of Denmark are now in the extreme north of Canada where they are making an investigation into the possibility of moving reindeer from Alaska into Canadian territories for the purpose of maintaining the food supply of the natives, according to a wireless message received by the Northwest Territories Branch. The two brothers went into the north country last June and will not come out until the spring of 1928, when they will make their report to the Dominion Government on all phases of the reindeer question.

Women in children, if they are not attended to, can be convulsed, fall down dead. Mother Graves' Women Extremities will protect the children from these distressing afflictions.

Patience is the zero mark of love's thermometer.

Easy provides the hand that fails one throws at success.

MINARD'S LINIMENT

Alberta's Industries

Returns filed by the Alberta Bureau of Labor show the industrial payroll of the province in 1925 at \$21,931,086, of which the wage earners' share was \$20,792,724.

New C. N. R. Branch Lines Proposed This Year For Alberta Would Open Up New Territory

The Minister of Railways in this Session asking Parliament, on behalf of the Canadian National Railways, for authority to construct sixty-eight miles of new lines within the Province of Alberta. The first of these lines is a cut-off between Trochu and Clover Bar, just east of Edmonton. This cut-off, eleven miles in length, will make possible shorter and faster routing of freight between Edmonton and Camrose and points beyond. At present trains between Edmonton and Camrose run over the circuitous route through the City of Edmonton, dropping down into the Valley of the North Saskatchewan River and cross-

ing the river on the low-level highway bridge to climb again on a very steep gradient out of the valley to the top of the bank—passenger trains then looking into the South Edmonton station.

Passenger trains now take 45 minutes to go from Edmonton station to South Edmonton station. Freight trains are limited to very light loads, partly on account of the heavy gradients on the line and because the motive power is limited by the capacity of the low-level bridges. The route via the new proposed cut-off will save eleven miles in distance for all trains, and over an hour in running time for passenger trains. Large economies in operating expenses can be made.

The other two lines that it is proposed to build in Alberta are in the northern part of the Province and are for colonization and development purposes. One runs in an easterly direction from Elk Point for a distance of nineteen miles, traversing good land and terminating at the North Saskatchewan River. Access to the south side of the river is thus afforded to settlers in the district, and there is a considerable area of good land on the south side of the river which will be tributary to the new line. It has been anticipated that this line would be extended to meet the branch proposed to run from Spruce Lake, Saskatchewan, in a westerly direction but the joining up of these two lines is not required at the present stage of development and traffic routing. It is felt that the new line is justified by the saving of road haul-

Dairies in Denmark Mostly Co-Operative

Very Small Number Are Operated by Individual Owners

Only 260 of Denmark's 1,600 registered dairies are in the hands of individual owners, all the rest being co-operative dairies, according to the Danish paper, *Tidende*. Sixteen hundred of the dairies produce butter for export, and more than one-third of the butter export trade is conducted by co-operative butter export associations established in various parts of the country. The Danish Co-Operative Wholesale Society has establishments in Denmark, for the purpose of exporting Danish agricultural products to Britain.

Twins born of Danish parents in India 26 years ago, are stated to be exactly alike in every detail, from blood pressure and finger-prints. Both are now students of law in England.

Mrs. Blake—"Why are you taking the battery out of the radio?"
Blake—"We're going to ride in the car."

Ruling Monarch Can Revoke Victoria Cross

Has Also Power to Restore Forfeited Decoration and Pension Which Goes With It

Private Godley told the Prince of Wales the other day that he was the first V.C. of the Great War, and since he won the great distinction more Victoria Crosses have been awarded than in all the 18 years before.

From February, 1856, when Queen Victoria instituted the world's most honored decoration, until July, 1914, 223 crosses were granted, while during the war there were 579 V.C. awards, making a total of 1,001.

The intrinsic value of the cross itself, cast from cannon taken at Sebastopol in the Crimean War, has not altered; the cost of production is less than 1s. The incomparable moral value of it also remains unaltered; but whereas originally it carried with it a special pension of no more than £10 a year, this may now in exceptional cases be increased to £75.

A V.C. man, like any Service pensioner, may draw his pension overseas, whether in the Dominions or otherwise, always provided that he has first obtained permission to reside abroad.

No one but the ruling sovereign has power to take a V.C. away from a recipient. The sovereign may exercise this power if a V.C. man be convicted of treason, cowardice, felony, "or of any infamous crime, or if he be accused of any such offence and does not after a reasonable time surrender himself to be tried for the same."

The sovereign alone also has the power to restore both a forfeited Victoria Cross and the pension that goes along with it.

Not every V.C. has been won in the face of the enemy. Private J. O'Flaherty, of the Rifle Brigade, earned his cross in Canada in 1866, although there was then no fighting on. O'Flaherty noted that a large van, full of explosives, had become ignited on the railway at Danville. He promptly opened the door found the source of mischief, extinguished the flames, and thus prevented a great explosion.

The late Lord Roberts, and his son, Lord Roberts, K.R.L.C. (who won his cross at Colenso), earned two crosses for the one family, but the famous Gough family can boast three—earned by General Sir C. J. S. Gough, his brother General Sir H. H. Gough, and the latter's son, Colonel J. E. Gough.

Could Go the Limit

It was a Pike county woman who wrote a note to the teacher concerning the punishment of her boy. The note read like this: "Dear Miss,—You write me about whippin' Sammy. I hereby give you permission to beat him up any time he needs it. He is just like his father—you have to learn him with a club. Pardon, please, into him. I want him to get it, and don't pay no attention to what his father says, I'll handle him."

Teacher (questioning class after lesson on preservation of food):—"Mary, tell me one way of preserving meat."

Mary—"Putting it in ice, teacher."

Teacher—"What do we call that?"
Bright Girl of Class—"Isolation, teacher."

Lope de Vega, known as the incredible Spaniard, wrote 1800 worldly and 400 religious plays.

Winnipeg Newspaper Union Fashion

A Smart Blouse and Separate Skirt

Exceedingly chic is the slip-over blouse of unusual design shown here. The round neck comes to a V in front and opens over a vest, and there are long straight sleeves and set-in pockets. View A illustrates the effective use of broad trimming, and View B depends on buttons for its adornment. No. 1541 is in sizes 16, 18 and 20 years. Size 18 (35 bust) requires 1 1/2 yards 38-inch material, or 1 1/2 yards 54-inch. Price 20 cents the pattern. Transfer Design No. 1142 is used to trim View A. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dresser. Price of the book 10 cents the copy.

Banff-Windermere Highway

The journey by motor car over the entire length of the Banff-Windermere highway through the heart of the Canadian Rockies can be made comfortably in one day. The route lies through virgin wilderness, but rest camps, automobile camping grounds, bungalow camps, and service stations are located along the way in such numbers as to guarantee accommodation for those who wish to make a more leisurely survey of the road.

Taxation is putting the lovely horse back into style in London, displacing the automobile. One firm now has sixty more horses than before the war, and is still dispatching mechanical vehicles.

Remarkable Skating Feat

This stunt was put on at the Banff Springs Hotel Rink during the recent Winter Carnival and excited much comment. It is pretty hard to say whether the spectators enjoyed the spectacle more than the actual performers of it, but certainly the former had not to work so hard, since it was surely easy to look at. The Banff Carnival was a great success this year and is now a fixture for good. With the opening of the new wing of the hotel and the inauguration of a winter season hardly less popular than the summer one, there can be no doubt but that Banff will be the Queen of the western amusement resorts in the near future.

Viscount Grey Analyses The British Character and Tells How The Empire Has Been Built Up

"If you look at the map you will see how exceedingly small the British Isles are, yet an influence has been exercised by them in the world's history quite out of proportion to the size of the country, and an empire has been built up of an extent and character which is unprecedented and unparalleled," said Viscount Grey in a recent public address.

"It is due, I think, to three things—to the island, to the climate, and to the race. The fact that we are an island has enabled the race to develop its own character and qualities in a way it could not have done had it been part of the Continent.

"It has meant that the door to go out into the world has been specially easy to open, but there has been no entrance for other people from outside to interfere. The climate is such that it is never so cold or inhospitable as to make labor impossible or unremunerative.

"Then the race comes from a very stout stock. Danes, Saxons and Normans were in their time pioneers in Europe. They were the adventurous spirits, the most energetic, the most enterprising, and the most courageous. They collected here because it was the adventure of the time to come here, and being here they found themselves where they could develop unimpeded.

"It is natural that people who are pioneers should have a real passion for individual liberty, and that stands out in our history as one of the great characteristics of the race. That by itself could never have enabled the English race to do much in the world. It would have resulted in chaos. But there was something in the race which corrected what would otherwise have been the great defect of that quality.

"They became penetrated with the sense that order was necessary. The passion for individual liberty meant an intolerance of arbitrary authority, and whereas in other parts of the Continent kings might establish an arbitrary authority, the English people would not stand it. But it was not enough to overthrow the arbitrary authority of a king. It was not safe for power to remain in any single class. We are not exempt from the universal law of human nature, and no individual, and still more no class, is to be trusted with power over other classes.

"Now power is distributed throughout every class in the country, what is the future going to be? I think, when any one class has abused power, the remedy has been to invest the class below it with power to protect itself. I trust now that power is distributed, that if any one class, even if it be the most numerous class, attempts to use that power solely for its own interests at the expense of the others, it will find there is a community sense in the nation which will prevent the abuse of power.

"The sense of order has made the English race equally conscious that if it will not tolerate arbitrary authority it must at least have a partial authority to produce order. The stronger the sense of individual liberty the more essential it is that we should be penetrated with a sense of order.

"All good qualities have their defects, and one of the defects of the independence of individual character has been that we have not been a very teachable people. But every defect has its compensations and the fact that we have been a nation of amateurs rather than experts has tended to develop resourcefulness and individual initiative, and this has been some compensation for our lack of disciplined study of science.

"We have also been essentially a practical people, and one essential feature of a practical people is that they do one thing at a time, and they do not select anything for their energies unless they feel it is within the compass of their power to achieve. And having done that one thing they make it a starting point for the next and so have continuity of action. That is how the British Empire has been built up.

"When once the British race is confronted with an issue it understands to be an issue between what is right and what is wrong, there is an uprising of conscience which is a remarkable and satisfactory thing. That core of moral and religious sense and conscience is a very real thing, but I do not like to dwell upon it because we have also a very material side. "I have been talking the language of liberty and love of order, rather than by any great deal, because looking through our history you see we have had to deal with practical problems, and these qualities have

been used in solving them rather than that we have gone out into the world as crusaders.

"Without our strong sense of order the very energy we had would have produced chaos; without the practical sense which made one thing lead on to another there would have been no continuity of action, and we should not have developed and grown and built up as we have.

"And but for our comparative lack of imagination we should probably have planned far too much and attempted things beyond our compass at the time, and come to wreck where as a matter of fact we have made success."

Auto Competition Is Not Affecting Horses

More Being Sold in Manitoba Than Ever Before Says Delivery Firm

They talk of the automobile supplanting the reliable old horse, and of the motor cars but statistics for Manitoba show that old dubbin is holding his own against this menacing competition. There are more than 200,000 horses in the province today, representing an increase of several thousand since last year.

Contrary to general belief there is no sign of horse disappearing from the streets of Winnipeg. It is estimated that there are more than 700 light delivery and 800 heavy horses "breeding their oats" in the Manitoba capital.

Because horses do not require a dose of antifreeze before they can be left to the exposure of the elements in winter, nor need to be towed out of mud holes in the spring, they still retain a large measure of popularity among concerns whose businesses demand deliveries into the suburbs of the city.

"We are selling more horses now than we ever did before," declared one manager of a large delivery firm. Good horses were in good demand; farmers did not appear to realize that there was a good market for the light type of horses. They were not breeding light draught type which found a ready sale in the cities.

Wireless Telephone Popular

Savoy Hotel in London Averages Six Calls Daily to New York

John W. Harrigan, an American business man, staying at a London hotel, achieved what is probably a record recently, when he spoke twice across the Atlantic on the wireless telephone. Both were business calls, made with a two hours interval between. The two calls cost him \$700. As an instance of the popularity of the wireless telephone from the point of view of Americans visiting in London, every room of the Savoy now has its New York, Pennsylvania, Maine and Connecticut telephone director, and each telephone instrument has been equipped with a second line, leading in place to improve quality. On an average about six calls a day are made to New York from the Savoy alone, and a special wire has been installed from the hotel to the switchboard in London which deals with the American service.

The African Chaplaine

Among many African and Asiatic girls were betrothed in infancy, and kept hidden until ready for marriage. They were taken to the warriors, an elderly woman being selected to see that they were not approached by any man. When the girls reached a certain age they were permitted to "come out" into the sun and be married. Survivals of the custom are seen in our chaplains, the custom of age party and "coming out" into society.

Could Not Be Done

An old countryman had been to London for the first time on business, returned in a bad temper.

"At that hotel," he complained, "they kept the light in my bedroom burning all night. I couldn't get a wink of sleep."

"Why didn't you blow it out?" asked his wife.

"How is that?" said the old man. "I couldn't. It was in a bottle."

"Hello! Is Rose there?"

"No."

"Is Violet there?"

"Is Pansy there?"

"No."

"Is Lily there?"

"No, say, this is a drug store, not a saloon."

Baby-lolling merchants sold goods on credit 1,000 years ago.

TRAGIC SLAYING OF FOREIGNERS AT NANKING

London. The British capital was shocked by news of the slaying of foreigners at Nanking, revealing the tragic days of the Boer uprising.

Only the briefest accounts have been received in official quarters, and no definite information had been received as to the number of the foreigners killed or wounded. Government spokesmen declare the guilty Chinese will be held responsible for the attack. Premier Baldwin said the British were constantly in contact with the central Chinese Government at Hankow.

The rapidly developing events will largely be left in the hands of the British representatives at the spot and any action they deem necessary to protect life will be backed to the hilt.

Secretary of War Worthington Evans told the House of Commons that another battalion of British troops was en route to Shanghai from Hong Kong but that no further changes in the defense force there were planned at present. Additional British destroyers were rushed to Nanking from Shanghai.

Because of the great distance involved, officials say it would be useless to consider reinforcements from Great Britain to meet the existing crisis.

The Government is being congratulated from China as well as here for its foresight in sending a defense force to the Far East. Otherwise, it is said, Shanghai would have been placed at the mercy of the vicious Chinese, particularly their guerrilla sympathizers.

No statement concerning the Nanking slayings was made by the Chinese by Foreign Secretary Chamberlain, who shortly received the demands of the Shanghai consuls and on the Nationalist commanders to control the foreigners.

Washington. The Chinese situation flamed to a sudden crisis filled with grave possibilities in the rear of British and United States naval guns at Nanking.

An unknown number of British and American lives have been taken by a mob of well-armed Nationalist soldiers. Guns of warships and rifles blasted the way to safety for the survivors.

Secretary of War Willard declared after conference with Secretary of State Kitchener, that Admiral Williams, the United States naval commander in China, had unqualified authority to employ his forces as he deemed necessary to protect American lives.

"He has the full support of the Government," the naval secretary said.

Grants To Universities May Be Discontinued

Ontario Government Cannot Undertake to Distribute Three Says Premier

Toronto. This will be probably the last year in which the government of Ontario will advance large grants to Queen's University, Kingston, and the Western University, London, according to Premier Howard Ferguson, speaking in the Ontario legislature as minister of education.

The time has arrived, said the premier, when a halt would have to be called to the grants to these institutions. They must not expect the province could further undertake to maintain these universities, and they must look to private sources for increased assistance.

C.N.R. Favorable Showing

Increase for 1926 of Net Earnings of Over 42 Per Cent.

Ottawa. Net earnings in 1926 of \$18,222,029 an increase of \$4,751,731 or 11.2 per cent, as compared with the preceding year, are shown in the annual report of the Canadian National system, tabled in the House of Commons by Hon. Charles Dunning, minister of railways and canals. The gross earnings of the system, including the lines of the Central Vermont, totaled \$22,526,216, an increase of \$2,184,556 over 1925, while total operating expenses increased only \$750,781.

To Visit Canada

London. According to The Times, Lt.-Col. L. C. Amery, secretary of State for Dominion Affairs, will start on an extensive tour of the dominions in the autumn. The paper states he will be away for a year and visit Canada, Australia, New Zealand and South Africa. Neither his itinerary nor the order in which the dominions will be visited have yet been decided.

Paris Approves Idea Of Canadian Minister

But Diplomatically Appointment Is Not Considered Worth While

Paris. The idea of a Canadian minister to France is receiving the strongest support in Paris, especially from French-Canadian trade interests, but as yet nothing is known here officially concerning the project.

It is pointed out that so far as trade between the two countries is concerned, the appointment would be of minor importance, but that diplomatically it hardly seems worth while.

It is believed here that Ottawa is watching the effect of Hon. Vincent Massey's appointment as Canadian ambassador to Washington and also the rest thereof, and that at the present there is little likelihood of the new policy being extended to other countries.

Many Japs Entered Canada Last Year

Majority Were Women and Children Says Minister of Immigration

Ottawa. Four hundred and forty-three Japanese and fifty-eight Chinese entered Canada during the year 1926, according to Hon. Robert Forke, Minister of Immigration, who replied in the House to a question from A. W. Neill, independent, Canada. Mr. Forke stated, of the Chinese 22 had already passed out of Canada and that no Chinese immigrants were among the number admitted.

With regard to entrance of Japanese, Mr. Forke stated that they were divided as follows: 119 males, 216 females, and 108 children under 18. There were 108 farmers and farm laborers in the number and 124 general or unskilled labor.

Italian Aviator May Come to Canada

De Pineda May Include Dominion in His North American Flight

Montreal. Possibility of an extension of many thousands of miles of the North American continent part of the flight of the Italian aviator, Commander de Pineda, is held out in activities received here from Italy. Under the new plan, if adopted, the aviator, instead of flying direct from New Orleans to Chicago and New York, would go via Galveston, San Diego and San Francisco, Seattle, Chicago, the province of Quebec in Canada and New York.

Commander de Pineda is now on the Brazil part of his European Western Hemisphere flight and no date is set for his arrival in Canada.

Maritimes Are Pleased

Lowering of Transportation Costs Will Prove of Great Benefit

Ottawa. "The implementing of the Dunlop report with regard to transportation costs and facilities will undoubtedly be a long step toward restoring a proper basis of transportation costs and services in the Maritimes," says a statement issued here by E. C. Cornell, who presented the case for the Maritime Government with regard to freight rates before the Dunlop commission.

Mr. Cornell estimated that \$500,000 could be a conservative estimate of the amount involved in the rate reductions.

No Aid For Victims of Farmers Bank

Ottawa. By a vote of 165 to 55, the House of Commons rejected a motion by Hon. J. W. Edwards (conservative, Progressive Association), that the government should grant the same measure of aid to those who suffer loss through the failure of the Farmers' Bank as has been granted to those who lost through the failure of the Home Bank.

A Picturesque Farewell

Wellington, N.Z. A quaint farewell message was sent by the Mayor of the city and the Mayor of New Zealand, who sailed for Australia after visiting New Zealand. The message read: "Farewell to you, the most white crane which flies but once in a life time, and to you, the most high born lady, good luck."

Air Mail For Canada

Ottawa. The Government intends to establish an air mail service and to extend this to Eastern and Western Canada as conditions warrant. Hon. Fernand Robit, Secretary of State, said in reply to a question in the House of Commons. He gave in detail as to when a start would be made to establish this service.

Congratulations From Reds

Warsaw. The communist faction of the Polish Diet sent a message of congratulation to Shanghai on its delivery from imperial oppression.

To Represent Consumers

Council to Look After Interests of Consumers Before Tariff Advisory Board

Ottawa. A meeting of members of the House of Commons took the first step to provide that consumers representing consumers be permanently before the tariff advisory board when applying for increased customs tariff are heard.

During the past year continued finally representing George Spence (Liberal, Maple Creek), appeared on behalf of the consumers, the expense being defrayed by Mr. Spence. However, the standing was for the purpose of having a committee of members of the House look after it in the future. An executive was appointed but no statement was issued until the question could be more thoroughly canvassed, when another meeting will be called. There was a fairly large attendance of members not only from the West but from the East.

Financial Panic at Tokio

Banks Unable to Pay Current Withdrawals Close for Adjustment

London. Despatches from Tokyo to the Exchange Telegraph announce a condition approaching financial panic there. Three banks announced they had "closed for adjustment" making a total of five which have been unable to pay current withdrawals.

The Bank of Japan called a meeting of bankers to consider coping with the situation, which is considered grave but not critical, being attributed to meanness over the earthquake relief legislation now before the diet.

London. A Tokyo despatch to the Exchange Telegraph says the Japanese Government has announced the money panic by giving assurances of unconditional support for all banks. A timely Japanese bond subscription in the United States, it adds, has been of material to reassure the public.

Nevertheless, the nervous strain left financial Tokyo increased and rapidly approaching, and confidence will be necessarily slow in returning.

FAVORABLE TO AMENDMENT OF SEED GRAIN ACT

Calgary. The Inter-provincial Council, at the close of its conference in Calgary unanimously approved of the resolution passed recently by the agricultural committee of the House of Commons recommending that the Dominion Seed Act be amended by granting the minister of agriculture power to reduce a license for any new variety of wheat until its quality has been established.

A committee was appointed by the directors of the Inter-provincial Council, consisting of the Dominion Cerealist, a representative of the Canadian Seed Growers' Association, a representative of the seed boards of the provinces in which the new variety originates, and representatives of the trade.

The purpose of the committee will be to make a study of the quality of any proposed new variety.

C. H. Dunlop, president of Manitoba Pool, in the course of a brief address in referring to a world wide organization stated that while some wheat seed men might have their heads in the clouds their feet were still in the mud. They would certainly not be led astray by prospect of a world pool if there was any danger of the Canadian producers suffering.

ENLARGEMENT OF THE CHATEAU LAURIER HOTEL

The illustration has been prepared from the architect's drawing showing the appearance of the Chateau Laurier at Ottawa when the new wing will have been added. The structural addition to the hotel will provide for another 200 rooms, making a total of 500 rooms available for guests. The changes, banquet hall and bathroom space and other public rooms will be provided on proper scale, thus enhancing the usefulness of the fine unit of the Canadian National Railway hotel system.

WOULD REMEDY PRESENT GRAIN GRADING SYSTEM

Moose Jaw. Explanations of the work and objectives of the Wheat Pool committee investigating grain grading were given at the annual convention of the United Farmers of Canada, Saskatchewan Section, this last by Harry March, vice-president of the Saskatchewan Wheat Pool.

The Saskatchewan Wheat Pool formed a small committee to investigate the system of grain grading in operation in Canada, said Mr. March. For the purpose of finding remedies for the faults in the present system the committee consulted with the National Research Council of Canada and the laboratories in Saskatchewan, Alberta and Manitoba, as well as the laboratory in Winnipeg under the hand of grain commissioners, were working on the problems involved. The laboratories were asked to attempt to ascertain the actual values of the present grades in pure products and whether or not the milling value of wheat was injured in the drying process.

The laboratories are trying to establish the actual limit of moisture that can safely be allowed in the current grades of wheat. At present the limit of moisture content is 14.4 per cent but there is a wide spread of belief that this can safely be increased to 15 per cent without danger of the grain being damaged in its milling value in transmission.

A second point in the laboratory investigation is to establish as definitely as possible the relative milling values of the various grades of wheat so as to determine whether the spreads between the grades at present are equitable from the point of view of the producer of the grain.

Mr. March said it was expected that the laboratories would have solved the problems involved before the 1927 crop was marketed.

The investigating committee had visited the inspection departments in Canada and the United States and as a result of their visit the committee came to the conclusion that in the inspection work was being done as well as possible under the existing circumstances. It was proposed that one grain standard should apply both to primary grain inspections and to output from terminal elevators so that the average of grade leaving the terminal elevators for export would be equal to the average at the inspection point in Winnipeg.

Will Be Important Port

Ten Million Being Spent on Construction at Havre

London. Havre will be one of the most important ports in Northern France, with widening, accommodation for the largest trans-Atlantic liners, when present construction plans are developed. Lord Kylsart announced at a general meeting of the London and Thames Haven Oil Wharves, Ltd.

These oil storage tanks have already been built. The whole scheme is said to involve an expenditure of about \$10,000,000. The new wharf will be built to berth the Leviathan and Majestic, side by side.

France Demands Total Tonnage

Geneva. The French draft of a general treaty for the limitation of armaments, shows a continuation of the French insistence of a system of total tonnage in any armaments of naval strength, instead of the splitting up of tonnage by categories as warships, as advocated by the United States and Great Britain.

British Officials Think Balkan Incident Closed

Dangerous Developments Averted by Action of Italian Government

London. British officials believe the latest Balkan war cloud has been blown over. This view is based on the conference between Sir Austen Chamberlain, the foreign secretary, and the Marquis della Torretta at the foreign office, when the Italian ambassador gave Sir Austen the reasons for Italy's alarm over the Alban situation.

The marquis also expressed the view that it was largely due to the prompt action of the Italian Government in informing the powers of its suspicions of Jovan-Stavka's intentions toward Albania that dangerous developments were averted.

Douglas Street considers the latest Balkan war is not in French diplomatic quarters, that the situation is ripe to seek to remove the cause of the trouble in the Balkans by a thorough examination of the situation created by the Treaty of Trianon.

The Jugo-Slav Government, it is known, has expressed willingness to accept such procedures and it is understood that Great Britain and France are disposed to use their good offices with the Italian Government in favor of having a frank exchange of views between Italy and the Belgrade Government.

Limit Time of Speeches

New Rule of House Becomes Effective Next Session

Ottawa. New rules of the House of Commons will become effective next session, the house having adopted the report of a special committee.

The house in committee of the whole approved the rule limiting general speeches in the house during debates to forty minutes, after debate on an amendment which would have added to exceptions under the rule "debates of opposition groups." Under the new rule, no member, except the prime minister and the leader of the opposition or a minister moving a government order and a member speaking in reply immediately after such a member, is a member making a motion of "no confidence" in the government and a minister replying thereto, shall speak for more than forty minutes at a time on any debate.

No Reciprocity Agreement

United States Will Not Enter Into Any Pact With Canada, Says U.S. Senator

Washington. The United States won't make any reciprocity agreement with Canada along the lines suggested by Premier King, according to Senator Wheeler of Indiana, Republican leader.

The senator, who is a prominent member of the Senate Finance Committee, said "Canada in any such agreement would want to exchange foodstuffs for eastern manufactured goods and this was out of the question. He asserted the farmers of the United States would never stand for it, their feelings having been stirred by failure to get farm relief legislation.

Appointment Satisfactory

Post Given to Sir Granville Ryrie Tribute to War Services

London. The appointment of Major-General Sir Granville Ryrie as our Australian High Commissioner in London, at Sydney has been received by Australians both in the community and in England with some pleasurable surprise. The post is regarded as a tribute to his services in the war. He was leader of the Light House in Gallipoli and Palestine.

Manitoba Elections

Understand That Provincial Vote Will Be Taken on June 22

Winnipeg. The Manitoba provincial elections will be held on June 22, it is understood, though no official proclamation has yet been made. Nomination day will probably be June 12.

SHANGHAI MOB ATTACKS BRITISH DEFENCE PARTY

London. Lt.-Col. Heywood, of the British defence force, and a small party of Britishers narrowly escaped mauling and possibly death in the native city of Shanghai, says a dispatch to The Daily Mail from its Shanghai correspondent, Sir Percival Phillips.

The dispatch says Lt. Col. Heywood and his party went by automobile to the native city of Hankow, the Chinese general, Chou, in discussion of alleviating the general situation.

The British car was caught in a meeting mob of students, was shrouded "all the foreign delegates" called for the execution. The latter appeared in his black clothes ready to perform a duty of life, when General Chou's lieutenant, a Chinese, rescued the Britishers in the nick of time.

Describing the "Northerners" as a band of Britishers narrowly escaped mauling and possibly death in the native city of Shanghai, says a dispatch to The Daily Mail from its Shanghai correspondent, Sir Percival Phillips.

FOR MIGRATION AND SETTLEMENT WITHIN EMPIRE

London. A motion by Captain H. A. Eden, Conservative, Warwick and Leamington, that new proposals to increase facilities for settlement overseas should be initiated in co-operation with Dominions, which was eventually adopted without discussion, began a private members' discussion of migration and settlement within the Empire in the House of Commons. Captain Eden contended that the standards should educate children in regard to the dominions. He thought the Empire marketing board was producing most valuable results.

L. R. Lundy, Conservative, Hull, East, seconding Captain Eden's motion, said the prospects for development in the Empire were very bright.

Dr. J. D. Shields, Labor, Edinburgh East, although he declared himself an internationalist, said he would prefer to see Canada peopled by the British race. He suspected that Central Europeans were welcomed there because they had a lower standard of living.

Lt.-Col. L. C. Amery, under secretary of state for Dominion Affairs, made it clear that Britain was not concerned with Empire development in order to rid herself of responsibility to a single citizen of Britain. "Our policy," he said, "is the strengthening to the full of the national fabric and the helping of the development of the Empire."

Confusion in Broadcasting

Movement Advocated in U.S. to Eliminate Nuisance Stations

New York. A confusion in broadcasting due to delayed legislation, said the radio industry \$100,000,000, said L. B. F. Raycroft, vice-president in charge of the radio division of the National Electrical Manufacturers Association, in a statement.

Mr. Raycroft said that he was in favor of revoking the licenses of every station which jumped the wave length reserved for Canadian use under the "gentlemen's agreement" of the Hoover conference of past years and added that all nuisance stations should be eliminated.

Appointment Satisfactory

Post Given to Sir Granville Ryrie Tribute to War Services

London. The appointment of Major-General Sir Granville Ryrie as our Australian High Commissioner in London, at Sydney has been received by Australians both in the community and in England with some pleasurable surprise. Timber Supply Nearly Exhausted

Says Softwood Resources of Canada Will Be Depleted Within 25 Years

"A review of the forestry situation throughout the world leads to the conclusion that available supplies of the principal timbers of commerce are rapidly approaching exhaustion," declares the second annual report of the Imperial Forestry Institute at Oxford, which mentions, among other startling facts, that the virgin softwood resources of Canada cannot last more than 25 years. The report summarizes the present situation as follows:

"Nine-tenths of the supplies of pine, spruce, larch, and fir available to meet the huge world demand for softwoods—which constitute about 50 per cent. of the wood used for industrial purposes—are situated in North America, North Europe, and Siberia. In Europe one-third of the total land area is under forest, but because of the enormous tonnage imported into Great Britain and other countries in the west of the continent, where the supply of home-grown timber is relatively small, the annual consumption of these softwoods exceeds the amount grown by about 2,000 million cubic feet. For the time being on account of difficulties of transport, prices, and, generally speaking, of their inaccessibility—the great forests of Russia and Siberia cannot be used for overhauling this deficiency. If these obstacles are overcome the timber which they produce is more likely to be sold in China, Japan, and even in the United States, than in the west of Europe.

It is necessary, therefore, for Great Britain and the rest of Europe to turn to the other chief source of supply in North America. But here, too, the prospects, and indeed the existing conditions, are the reverse of hopeful. Even from Canada, largely drained of its softwoods by the wood pulp industry, little is to be expected. Each year fire, insects, and disease destroy an amount of timber as great as that felled by the lumbermen, and only 27 per cent. of the original forest is left.

East of Winnipeg much of the sawn timber has already been consumed, and in British Columbia, which produces three-quarters of the total supply of the Dominion, it is estimated that the virgin softwood resources cannot last for more than twenty-five years. In the United States, which consume about half the timber of the world and incidentally provide a market for over four-fifths of the trade of Canada in forest products, the story is practically the same. Their original forest area has been reduced by more than one-half, their existing resources are given a life of only twenty-five years, and their imports of timber from Canada increase as the Dominion shipments to Britain decline.

New Fire Apparatus For Buckingham Palace

Old Fashioned Outfit Being Replaced by Up-to-Date Machinery

The hacket brigade and all other paraphernalia of the old-fashioned fire fighting outfit at Buckingham Palace is to be replaced by up-to-date apparatus.

The garden belt has disappeared, and modern houses operated by electricity have been installed to summon aid in case of emergency. Notwithstanding the outmoded fire prevention machinery long in use at the palace, there has not been a fire here these three hundred years. This is attributed to construction and the fact that the buildings are guarded day and night.

The worst fire in the history of the royal houses was in 1693, when Whitehall Palace was destroyed.

Mount Armour

Mount Armour situated on the International Boundary between British Columbia and Alaska has an elevation of 5,775 feet. It is named after Hon. Mr. Justice John A. Armour, Chief Justice of the High Court of Ontario, who was one of the original Canadian members of the Alaska Boundary Tribunal in 1903.

Find Stone Age Relics

Hidden in a cave containing prehistoric relics of three distinct ages—stone, bronze and iron ages—have been found in the forests of Paderborn, Germany. Archaeologists have found pottery, quartz implements, bronze jewelry and weapons fashioned from bone. A fireplace had been built in one of the caves.

Domini: "Can you live within your salary?"

Porey: "Well, I know I cannot live without it."

Best Business In The World

Seems to be Attending Strictly to One's Own

John James was an old farm hand in Cornwall. For many years he had labored faithfully and silently, with only an occasional day off, and a week's vacation each year after harvest. It was John James' peculiar custom to spend his odd hours of work in visiting old graveyards; and when his annual vacation came around, John James, dressed in his Sunday best, would spend each day of his week in a different graveyard.

On returning from one of his solemn rounds of visitation he was greeted by a busybody woman of the village:

"Well, John James, I see you've got back again."

John James nodded gravely.

"Where you been—same old places?"

John James nodded again—still more gravely.

"Well!" exclaimed the busybody, "whatever you find entertaining in graveyards I can't see. You're going to get there yourself soon enough, John James, and when you get there you're going to stay a long time. Why under the sun then do you want to go there now?"

John James straightened himself in his black broadcloth suit and bowler hat and gave the woman a stony glare.

"I spend my spare time in graveyards," he said, "because they are the only places where folks mind their own business."

Another and somewhat gaudier way of putting the matter is that of the gracious "Elizabeth," who has this to say in one of her recent books:

"There is a great virtue in sweeping out one's own house and trimming its lamp before starting on the house and lamps of a neighbor; and since new dust settles every day, and, I believe, need constant trimming, I know not when the truly tidy soul will have attained so perfect a polish as to justify its having forth to attack the private dust of other people."

As our experience with human nature widens through the years, and we come to realize how much trouble and vexation is caused by individuals concerning themselves unduly with other folk's affairs, the thought grows in us that perhaps the Best Business in the World may be simply that of minding one's own.

World's Largest Book In British Museum

Volume of Maps Was Presented to Charles II. In 1660

While the smallest books in the world, the *Ullou* and *London Almanack*—were being sold at auction the other day, the world's largest book, the *Ullou*, which is a hard, red, spring wheat, is a discovery of the Central Experimental Farm, and the bulletin shows the results of tests and informs growers generally in regard to this new variety of wheat.

A meal within a meal, to parody a well-known phrase, might describe a dish which was served at a medieval supper at the recent Chelsea Arts Club ball. This was "Babbly-Jock," a favorite dish in Yorkshire 500 years ago, made by stuffing a goose with a chicken, the chicken with a lamb, the lamb with a quail, all boned and cooked together.

If you can't marry the one you love try to love the one you marry.

The reader found it to be a volume of maps presented to Charles II. in 1660. The binding is morocco, four skins being used for each panel. It is decorated in gold figures of horses, roses and crowns, with huge bosses and clasps.

New Cargo For Airplanes

Dynamite Will Be Taken From Winnipeg to Fort Churchill

Airplanes, which have been used exclusively in the northern mining areas and on forestry patrol in the north country, will receive a new role shortly, that of dynamite carriers. A cargo of 500 pounds of dynamite will be taken to Fort Churchill by a plane chartered by the Dominion Government from a Winnipeg company. Arrangements are being completed for the final shipment, and the plane will leave within a short time. The dynamite will be used by Dominion Government engineers who are to undertake an investigation at Fort Churchill harbor. On later trips, the plane will be used for the transportation of engineers and general supplies.

Pay to See Grapevine

Last year 250,000 persons paid an admission fee to see the King's 155-year-old grapevine at Hampton Court, England. It has produced as many as 2,500 bunches of grapes in a year. With its average crop now kept down to about 500 bunches it maintains remarkable vigor. The proceeds of the grapes sold, go into the Treasury, also the gate receipts of the thousands who pay a penny to see the vine.

Simon: "I can get anything on my radio that you can on your phonograph, and more, too."

Jimson: "Is that so? Let's see you tune in on Caruso."

Co-operative Marketing Pays

Alberta Farmers Market Eggs and Poultry Through Co-Operation

In the year 1926 the Alberta Co-operative Poultry Producers Ltd., Calgary, Alberta, handled 223,432 dozen eggs, all of which were delivered by members who had signed producers' contracts. When eggs were received the association paid a price two cents below the prevailing market price, and later made final settlement. The year was divided into four pool periods. The first period was January and February when receipts were very light and overhead high, and the association was able to make an additional return of only two cents a dozen to producers. The next two periods included the months of heavy receipts during which 200,000 dozen eggs were handled, and producers received a final payment of four cents, or two cents above market price. As some of these eggs were placed in storage the final settlement had to be delayed till the stored eggs were sold. The fourth pool, extending from October 1 to the end of the year, contained but few eggs. A final initial price of 20 cents was paid and final settlement has not been made yet.

In addition to eggs the association handled 113,700 pounds of turkeys, and 209,923 pounds of chickens, geese and ducks. Final payments brought the returns for turkeys two cents above prevailing quotations, and for chickens, one cent above market prices.

Extending the Wheat Line

Discovery of Garnet Wheat Makes Possible Production of Wheat Further North

A gain of a million dollars to western wheat growers with the extension of the wheat line further north than ever before, and possible cultivation of millions of acres in certain districts, through the discovery of Garnet wheat, is forecast in a bulletin on Garnet published by L. H. Newman, Chief Dominion Cerealsist at the Central Experimental Farm, Ottawa, Canada, which is a hard, red spring wheat, like the famous Marquis wheat, is a discovery of the Central Experimental Farm, and the bulletin shows the results of tests and informs growers generally in regard to this new variety of wheat.

Ancient Dish Revived

A meal within a meal, to parody a well-known phrase, might describe a dish which was served at a medieval supper at the recent Chelsea Arts Club ball. This was "Babbly-Jock," a favorite dish in Yorkshire 500 years ago, made by stuffing a goose with a chicken, the chicken with a lamb, the lamb with a quail, all boned and cooked together.

If you can't marry the one you love try to love the one you marry.

The reader found it to be a volume of maps presented to Charles II. in 1660. The binding is morocco, four skins being used for each panel. It is decorated in gold figures of horses, roses and crowns, with huge bosses and clasps.

Earth Waves Form Mountains

Strip of Land Forming West Coast at One Time Is Now Submerged

Existence of great mountain ranges with the prospect of obliterating them again in the course of time, is claimed by Dr. R. C. Andrews, noted geologist in Yale University, where he will deliver a course of lectures on the geology of the Pacific.

Dr. Andrews does not take credit for the discovery himself, stating that it has been determined by Canadian geologists that there is a great strip of land lying below the surface of the ocean west of the present Canadian coast line which at one time was a part of the continent.

This huge area, said Dr. Andrews, was submerged in the undulatory motion of the earth, and its presence has been detected now only through depth soundings and other scientific forms of research.

"A great strip of land existed where there is sea today," said Dr. Andrews. "It was submerged at the same time as the great coastal ranges of mountains arose. Historically, old the Sedkiras and Rockies are geologically very young. Their rising was coincident with the sinking of the great territory of the west from the extreme end of Alaska down to the United States border, passing west of Vancouver Island."

Canada Importing Wool

Producers and Weavers to Get Together With the Object of Furthering Home Industry

Wool growers and wool manufacturers will be brought together by the National Research Council of Canada, a Dominion Government institution, which has announced that wool is the next product to be investigated. The Council will work under the direction of Dr. H. M. Tordy, of the University of Alberta. It is claimed that for reasons who or otherwise, certain manufacturers have been prejudiced against Canadian wool in the past, and while big strides have been made in more recent years to bring the producers and weavers together, this country is still importing more wool than is grown at home. The Research Council proposes to make a study of the various grades of domestic wool and determine the best uses for each. It is admitted that for one or two purposes the Canadian product is not suitable, but in nine cases out of ten it is said to be the equal of any in the world.

Prince Saves Pet Dog

Prince of Wales Risks His Life When Dog Is in Danger

How the Prince of Wales recently risked his life to save his pet cairn terrier "Cora" from death under the wheels of an express train, is a story that has just leaked out of Milton Mowbray where the Prince makes his fox hunting headquarters.

According to witnesses of the incident, "Cora" who is a frisky terrier, accompanied the Prince during his American tour in 1924, suddenly sprang from the Prince's arms as a London express train raced into view. The dog jumped from the platform to the tracks in the path of the approaching train.

Clashing to the Prince to stand where he was, two Scotland Yard detectives set out in pursuit of the dog. But the Prince dashed past them, and, snatching his pet from the tracks, vaulted back on the platform far beyond the express' clasp.

The narrowness of his escape brought a thrill of terror to a score of persons on the platform.

Lord Willington's Tribute

Testifies That Women Are a Great Help to Men in Public Affairs

When a diplomat of Lord Willington's wide experience testifies that women are a great help to men in the administration of public affairs, it is only common sense to take heed. His Excellency the Governor-General is now a man given to impartial remarks. When he says women have brought the quality of civility into public life, it is easy to understand what he means. The fact that this very quality adds considerably more to what of a handful in moments of grave national crisis by no means inaudible in value, as a general principle, "to work together for the common purpose, and to do so shall raise the spirit and soul of Canada," says His Excellency, and arrive nearer the ideal of brotherhood and distinction of all nations of the world. Truly a noble ideal that may well engage the attention of thoughtful men and women everywhere. Montreal Star.

Home-Made Misch for Baby Chicks

Home-made mash has proved to be very successful and considerably more profitable than commercial mash in tests in feeding baby chicks conducted at the Morden, Manitoba, Experiment Station. The home-made mash is a red color of equal parts of bag, shorts, corn meal, oil, and meat scraps and cost \$2.50 per pound against \$6.49 paid for the commercial mash. Both received the same scratch feed and were given equal quantities of buttermilk. In all the experiments the home-made mash made gains in weight as much as that of the commercial mash.

Of the twenty-two million shells made in the United States during 1926, only about one million were blown.

The Golden Age

At What Age of Life Does Man Accomplish His Best Work

Among the numerous questions Thomas Edison was asked on his eightieth birthday was this: At what age is a man most productive? He answered at thirty-five. With due respect to his own wide experience, it ought to be said that he was merely giving a personal opinion. At about that time in his life he probably felt his mental and physical powers at their highest and working in the happiest co-ordination. Five years earlier he had invented the phonograph, and at thirty-five opened in New York the first commercial electric lighting system. He made important inventions earlier and still more important ones later. He was forty-four when he invented the motion picture camera, one of the pillars upon which the whole moving picture art and industry depends. It is impossible to predict of a given man at what period of life he will produce his most important work, but statistics have been compiled which show the averages. Some years ago W. A. N. Dordani, as quoted in the *Providence Journal*, found out that the world's masterpieces were produced, on the average, at the age of fifty. As to the great discoveries of chemists and physicists were made at the age of forty-one, while the naturalists and jurists at the time of their most important contributions to their arts and sciences were fifty-eight. The poets produced their masterpieces at the age of forty-four. Since poetry is so much a matter of intense feeling, much of the very finest has been the work of young men, though Thomas Hardy is a remarkable instance of a poet who well past eighty can remember and powerfully express the intense passions of youth—Maid and Bishop.

Chinese System of Starting at Bottom of Page and Reading Upwards

Is Best for the Eye

When the eye runs along a line of print in a book, it does not travel smoothly from left to right of the page, but jumps from line to line, making in a whole word or, perhaps, a few words at a time, and then jumping on to a fresh group.

If the eyeball is illuminated with a ray of light, which it reflects back again on to a moving photographic plate, the photograph will show exactly, in the form of a number of little spots, the way that movements the eye has made.

These photographs, made with a special instrument used at the psychology laboratories at Stanford University, have enabled those studying the languages of the world to make a very fascinating discovery. This is, that the eye finds it much more comfortable to read from the bottom of the page to the top than from left to right, and so we find that the ancient Chinese, some of the earliest people to invent writing, had the wonderful sense to adopt the most suitable style of writing, for they started at the bottom of the page and wrote upwards.

Another interesting discovery from the study of these photographs is that the eye never bothers to begin reading a line of print from the very beginning, nor does it ever travel right to the end. It focuses itself on the second or third word of a new line, takes in a little picture of the meaning, and then skips to the next stopping place—"My Magazine."

Potential Water Power

The power available for the development of natural resources is a conspicuous feature of Canadian economies. Water power in abundant quantity is available from coast to coast and only near the present centres of industrial development has been harnessed. In the mountainous areas of the north, particularly in the Yukon, the Mackenzie and the Athabasca, there are enormous reserves of water power. In the southern portions of Alberta and Saskatchewan and in the Maritime Provinces, there are enormous reserves of coal and lignite. These resources are abundant in conjunction with both the forest and metallic mineral resources in all parts of Canada.

Survey Northern Points

Due to the increasing traffic along the Mackenzie Valley system of waterways, the Department of the Interior has for several years had parties of surveyors at work along the route, particularly in Great Slave lake and Slave river. From these surveys, maps have been prepared which have proved most useful to navigators. Boats, beacons, and lights have also been put in place along the route.

Parleying Is Indulged In by many young women in France as an aid to health and grace.

It's a man's weakness that finally overpowers his strength.

Depending On Prairie Provinces

Are Responsible for Prosperity of Dominion Is Opinion of Winnipeg Mayor

"After travelling from coast to coast and studying the question from many angles I have come to the conclusion that the three prairie provinces are responsible for Canada's prosperity as a whole," was the statement of Mayor R. H. Webb, Winnipeg, in addressing the Calgary Board of Trade recently. "Without the prairie neither the Pacific coast or Eastern Canada would function very far," he asserted. Mayor Webb dealt at some length on the question of transportation, suggesting that they should not fight or buck the railways but to co-operate with them and pointed to the importance of the development of waterways, and of improved highways.

"Alberta today has got Prince Rupert and Vancouver and to a very large extent you have solved a certain portion of your transportation problem by opening of the Panama Canal, but that does not mean you should rest there," he said. "You have got to help Saskatchewan and Manitoba to solve their problem."

"We find Minneapolis and St. Paul today spending millions of dollars in making those cities seaports," he said, "and they are today connected directly with the sea and it has put Winnipeg within 500 miles of ocean ports."

Mayor Webb pointed to what could be done in the development of river and canal transportation with boats fitted with caterpillar transmission, boats that would carry 1,000 tons of freight but only drawing 16 inches of water.

How the Eye Reads

Chinese System of Starting at Bottom of Page and Reading Upwards Is Best for the Eye

When the eye runs along a line of print in a book, it does not travel smoothly from left to right of the page, but jumps from line to line, making in a whole word or, perhaps, a few words at a time, and then jumping on to a fresh group.

Health Broken—Lost 66 lbs. Now Well, Won Back 82 lbs.

Ottawa merchant, formerly city officer, riddled by kidney trouble. Wasted from 201 to 135 lbs. Tanlac restored robust health; now weighs 217 lbs. and feels fine

William Squire's grocery at 283 St. Patrick St., is well known in Ottawa. Mr. Squire was formerly a police officer. When ill-health seized him he lost weight rapidly. "I had kidney trouble for 6 years," he tells, "and was given up as a hopeless case. Many times, from sheer weakness, I have fallen where I stood, and had to be helped to my feet."

"Pains racked my entire system, especially my back, which felt like splitting. Needless to say, I could neither eat nor sleep normally. Weak spells and nervousness would leave me trembling all over. I faded away from 201 to 135 lbs., and tried endless treatments and remedies in those 6 years without result."

"I had begun to despair, and when a friend advised Tanlac I was skeptical. But one month's regular use of this wonderful medicine convinced me that I was on the road to health. I kept on taking Tanlac, and to my delight and surprise it made me a new man in a surprisingly short time."

Now I weigh 217 lbs., eat and sleep like a healthy boy, and feel like a different man altogether. If unduly or overworked are taking toll of your health, try Tanlac. It is nature's own tonic, made from roots, herbs and fruits. Your druggist has it. Over 52 million bottles sold.

nearly intent upon his wheel and his thoughts concentrated upon some head in the road, she studied his face steadily.

They paused for a minute at the village of La Turbie. Across a narrow bridge in the windows of a villa were pinkies, as red as where, and before the children's. In the evening, a few nights, there would have been a brilliant blaze. The atmosphere had

The Care of Her Family Weighs Upon the Energies of the Mother

Mrs. Matilda Milne

LONDON, Ont.—"Dr. Pierce's Favorite Prescription is a special tonic for women to take at any time when weak and run-down. While I was bringing up my family I found the 'Favorite Prescription' very beneficial as a strengthening tonic for nerve-builder. On several occasions I took it when in a run-down and nervous state of health and it built me right up. I found it especially beneficial during pregnancy. It not only kept me in good physical condition but was a great help to my mental state, also."—Mrs. Matilda Milne, 12 West St.

All druggists, Tablets or liquid. This Prescription is made in Dr. Pierce's Laboratory in Heidelberg, Ont. Send 10 cents there if you wish a trial package of the tablets.

W. N. L. 1674

had left down the road—swung into the yard. The future of the last flared suddenly bright and, for an instant, enveloped them in their undimmed glow.

Kenneth's fingers lingered at their task of fixing the silver car. His fingers quivered when the short, gold-brown strands of hair slid among them. Joanna moved closer to him, and rested her hand lightly on his arm. When he let his fingers relax, that the night breeze might blow her hair about them, he started into her eyes and fancied that they had widened and that a circle of black had formed about the shimmering iris in each of them.

Then he caught her in a fevered, clasp. She did not draw away, but reared up and drew down his head until she could trace his face with her two hands. Then she let him rest his lips on hers.

When he let her go because he dared hold her no longer, and because couples who had come out into the yard were stopping to glance curiously at them, Joanna laughed, the rippling laugh that might be irritating as well as amused, and said to him while he fixed his own mask:

"You see, Roddy, the walls clear down. I'm in the open, and I'm fighting fair."

When they had disappeared across the club house veranda and through the doors which had been opened to them by the red car, Kenneth, one of the two who had sat so lightly in their seats in the other car, descended. To the one who remained at the wheel this one said:

"Back around between the red car and the gate, so you can get out first. It there's a rush for the road at any time."

"It is getting thick and misty, Master," the one at the wheel grumbled, in the voice of Antoine. "In another two hours we won't be able to see the wheels and all there'll be between us and eternity, on the road down there, will be the brakes."

"Then your men will have less fear of being reorganized, and so will you, the other, returned. "That's pleasant, you don't it?"

While Antoine muttered indistinctly, Brandon threw his seat into the car and fixed his mask carefully. He did not go at once into the house, but lingered on the veranda, smoking. When he had finished his cigarette he tapped on the door and was admitted. The orchestra was playing a fox trot in luscious rhythm and the floor was thronged with couples whose moods the musicians knew so well how to interpret.

Brandon surveyed the dancers with searching glances. Then he looked among the tables. Suddenly his eyes found a shadowy figure in black, with gold-brown hair, at a table half hidden behind the posted panels that shut off a corner of the balcony that overlooking the dance floor. He appeared to be satisfied, then, and dropped in to a place at an unreserved table and ordered a liqueur.

CHAPTER XXXII

La Turbie

Even as Brandon watched the slim figure in black, from his table, the orchestra struck up a waltz, a slow, rhythmic, evocative melody that

like a song of passion. The figure in black rose. The man across from her whom Brandon had recognized easily despite his domino, as Kenneth would, was on his feet with her. A woman who had become careless lowered up to Brandon and boldly commanded him to take her onto the floor.

"We'll leave the car for the road," Kenneth answered. "We may have to make a dash for it if the mist becomes too thick."

Joanna slipped to the ground and stood close to the car. Kenneth stood beside her while he drew off his overcoat, receding his domino at shining white satin. It is a fiction at the mountain-top clubhouse that one must mask, so that all who go there may be assured of their anonymity—

if they require it.

Joanna produced from a pocket of her wrap her son's black mask, a strip of thin velvet that barely reached the tip of her nose, with two almond-shaped slits for her eyes. Thin silver cords, to be concealed and fastened in her hair, dangled from either tip of the mask. She held up her face to Kenneth in mute invitation for him to fix the tanning strip of velvet in its place before they should enter the house.

Her warm hands, creeping partly opened lips, fanned him gently. She smiled up at him, half drowsy, as if the faint melodies of passion that came out from the dance floor had lulled her senses into a yielding tenderness.

Careless of the tang of damp cold she allowed her wrap to fall back and bare the throat that seemed to blend into the silver sheen of the ghostly moonlight. Twin lights of another car, they recognized it as the one they

Children's Colds

Are best treated externally. Check them overnight without using any medicine. Vicks VapoRub.

"Before the necessity I must urge upon you all. I must ask you sorrowfully to make your departures from my hospitalities as soon as may be convenient for you. The mist, of which you must have taken note, you so kindly came to our club house in the evening, has risen fast and densely. Soon your car lamps will be of no use to you. Even now you must go down very carefully. If there be any of you whose humor it is to remain with us until daylight, when the sun will chase the fog away, I assure you of my welcome. Those of you who feel it your duty to descend before the night has passed, must go at once—and very, very cautiously, in a little while it will be too late."

(To Be Continued.)

Says Price Needs Rest

Life is Too Strenuous and Health is Beginning to Suffer
The Passing Show, London, says: The health of the Prince of Wales is at last beginning to suffer from the results of his too exacting career. His most intimate friends have found him telling him that he must have a real rest, a sea voyage without official functions, or at least a quiet time at some home or foreign health resort.

The last few years have been strenuous ones for him. His foreign tours, with abundance of business and other economies, his almost daily visit to perform official opening and similar in the provinces, his recent "stunning parties," the hunting, horse-racing and dancing—all these occupations have combined to wear down his powers of recuperation. He is fairly strong constitutionally, but no young man who can burn the candle at both ends for so long with impunity.

Bee-Keeping as a Side Line

Among the well-established sidelines of agriculture in Southern Alberta, bee-keeping has come to have a recognized place. Five commercial firms now have stands of hives covering the district fairly completely.

Sour Stomach Risings Subdued by "Nervine"

A Few Drops Bring Relief

The wonderful relief you get from twenty drops of Nervine will surprise you. "Take it in sweetened water, and almost immediately you feel better. Nervine brings up the gas caused by fermenting food, and relieves that distressing feeling in the stomach. When colic or cramps strike you, at night, Nervine is a sure relief. For general use in the home, for expectant girls, always keep trusty Nervine on hand. 35c at all dealers."

What is regarded as the earliest recorded fossil foot has been found in New York state.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

Oxford Dictionary Nears Completion
Containing 10,000 words, the Oxford Dictionary is to appear next year. Twelve people have been constantly at work on the edition since it was started in 1882 and before it is tested \$250,000 will have been spent on it during the 16 years of preparation.

A good store is often of more benefit to a man than good advice.

PIMPLES OVER FACE AND HANDS

Irritation Caused Scratching. Healed by Cuticura.

"I had pimples all over my face and hands. The pimples were small and itched. People have been caused me to scratch. Scratching caused eruptions, and I could not rest or sleep either day or night. "I used several remedies but got no relief. I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. After using it three days I got relief so purchased more, and within a month I was completely healed." (Signed) Miss Adelaide Thomas, 45 Hohner Ave., Kitchener, Ont.

Use Cuticura Soap daily for the toilet, assisted by Cuticura Ointment when required, and have a fresh complexion free from pimples and blackheads. Sample Free Trial Box. Add 10c Canadian postage. Send to: Cuticura, P.O. Box 52, Montreal 25, P.Q. Cuticura Shaving Stick 25c.

Medals For Good Drivers

Safety First Association in Britain Gives Award to Careful Motorists
Silver medals, and perhaps gold, are to be awarded to motorists throughout Great Britain for careful driving. The competition is open to all drivers of any class of road vehicle employed by members or subscribers to the National Safety First Association. The medals are awarded to every driver who completes five consecutive years free from blameworthy accidents. At the end of each year free from accident each driver gets a diploma. It is planned to award a gold medal to those who go ten consecutive years free from blameworthy accident.

THE SPRING TIME IS TONIC TIME

Something is Needed to Quickly Improve Your Health

With the passing of winter many people feel weak, depressed and easily tired. There is no particular disease, but the system lacks tone. You find yourself tired, low-spirited, unable to get round sleep at night. All this is the result of closer indoor confinement of the winter months and shows that the blood has become thin and watery. New, rich, red blood is what you need to put you right and there is no other tonic medicine can give you this new rich blood as surely and as speedily as Dr. Williams' Pink Pills. This new blood goes to every part of the body and quickly improves the general health. The digestion is toned up, and you have better appetite, the nerves are strengthened and sleep is refreshing. The special value of Dr. Williams' Pink Pills at this season is shown by the statement of Mrs. Elizabeth Clarke, R.R. No. 1, Hastings, Ont., who says: "I know Dr. Williams' Pink Pills are a good blood builder because I use them in the spring, when one naturally feels run-down after our long winter. Last spring I was feeling weak and easily tired, and again used the pills with the result that I have had splendid health since. The pills also revived my daughter, Mae, who was badly run-down, and seemed almost bloodless. She used the pills habitually for a time and she has enjoyed the best of health. Naturally I never hesitate to recommend Dr. Williams' Pink Pills to people who are run-down. You can get these pills through any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont."

Little Helps For This Week

Be strong, and quit yourselves like men. —I Sam. iv, 9.

ok, this battle-field vast of the world. This transient rush of the day. This gauge that forever is lurid. This ceaseless recoil of the blow.

This string of command of the King. Proclaimed through His armies. That none of His soldiers shall flinch. Their armor one moment asid.

Life is not victory, but battle. Fight on, fight on. The perfect character shall come at last. What will it be to fight no more? Shall we then forget the battles? Shall we then forget our? Why should we? Hated, remembered, subdued, let them hang on the walls of memory like the shields of vanquished enemies.

It has Many Qualities. The man who possesses a bottle of Dr. Williams' Pink Pills will be armed with a powerful weapon against many ills. It will relieve a cough, break a cold, prevent sore-throat, and will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

More Building In Canada

Six Provinces Report Large Increase Over Last Year
The value of the building permits issued by 63 cities during February as compiled by the Dominion Bureau of Statistics was higher by \$2,982,255 or 12.2 per cent, than in the preceding month and by \$62,590, or 2 per cent, than in February last year; the total stood at \$7,778,352 during the month under review.

Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba and Saskatchewan reported increases in value of building permits as compared with January, 1927, while in Alberta and B.C. there were comparatively small decreases.

More than 2,000 years ago, an Egyptian barber discovered the principle of the organ and constructed the first known instrument of the kind.

Kill wars with Minard's Liniment.

The pipes of an organ in a Belgian church are made entirely of paper. Note-paper, of course.

Using More Canadian Wheat

Germans Prefer It to That From Any Other Country
The consumption of Canadian wheat in Germany is increasing year by year because the preference of the German people is rapidly swinging from rye bread to wheat bread, was the statement made by Dr. Lorenz, German consul at Winnipeg, who paid his first visit to Saskatchewan recently and while in Saskatoon spent a great deal of time at the University where he showed a particular interest in all things having to do with Saskatchewan agriculture.

The change from rye bread to wheat bread has come about during the last few years, according to Dr. Lorenz. "We are, I believe," he said, "the second greatest importer of Canadian wheat and we prefer that wheat to that of any other country."

A Corrector of Pulmonary Troubles.
Many testimonials could be produced showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory process, but the best testimonial is experience and the oil is recommended to all who suffer from these disorders with the certainty that they will find relief.

Preparations are being made by the British Air Force for a trip around the world next spring.

EXPERIMENTAL FARM NOTES

The success in rearing chickens is dependent on the care and management they receive when taken from the incubator. High mortality is frequently the result of over-feeding rather than under-feeding. The practice followed at the Scott Station is to take the chicks from the incubator on the twenty-second day and no feed is given for 48 hours after taking from the incubator. The first feed used is equal parts of finely cracked wheat, corn and hulls oats fed dry on a clean smooth floor or a piece of paper. The chicks are fed five times per day and at each feed the quantity given is one ounce for 50 chicks. After the end of first week a dry mash is used to replace one of the five feeds per day. This mash is started gradually by leaving it before the chicks on a paper for only a few minutes the first day and longer each day until they are getting all that they will eat from a hopper, when the cracked grain is fed twice a day in the litter.

When sprouting oats for the adult stock, a tray of oats is allowed to grow two or three inches high and these sprouts are cut off and chopped fine before feeding to the chicks. As soon as the weather permits the chicks to get outside the green feed is discontinued. If milk is available it is given in a small drinking fountain but care is taken not to change frequently from milk to water or vice versa inside of two weeks.

Further detailed information on the care and management of the new-born chick may be obtained by writing the Superintendent, Experimental Station, Scott, Sask.

Mennonites continue to return to Western Canada from Mexico. They find the climate down there too hot, labor conditions bad, and general conditions unfavorable. The frequent revolutions also have a disquieting effect upon these peace-loving people. They enjoyed prosperity in this country and are sorry they left.

A Trip to Bermuda

Chas. E. Neff, who returned last week from a trip to Bermuda, brought into our office some interesting coloured views of these islands lying in the Atlantic ocean over seven hundred miles in a south-easterly direction from New York. Bermuda combines ideal climatic conditions with scenery of incomparable beauty. The hundred-odd islands are set in an iridescent crystal-clear sea, and the lure of the tinted waters is irresistible. It will be interesting to our readers to learn that there are no factories, railroads, street cars, automobiles or motorcycles on the island, but the horse and carriage provides the means of transportation. Mr. Neff was at many places of interest on the island, but one point which deserves special mention was Bermuda's natural marvels, the sea gardens, which can be seen from glass-bottomed boats, and the magical caves.

These islands were discovered by a Spaniard, Juan de Bermudez, in 1509, and later were named after him.

To-day the population of Bermuda is approximately 26,000, consisting of 12,000 whites and 14,000 coloured people.

Mr. Neff says that his trip was most enjoyable and one ever to be remembered.

Chinook School Literary Society Give Programme

The meeting of the Literary Society of the Chinook School was held in the Assembly hall on Friday afternoon. The meeting was opened by singing O Canada and the reading of the minutes of the previous meeting. The following very enjoyable programme was presented by the members:

Pianoforte solo, Dorothy Carter; Reading, by Lowell Brownell. A debate, "Resolved, that moving pictures do more good than harm." The affirmative was taken by Le-mare Seeger and Alfred Deman, while Sadie McLean and Muriel Smith defended the negative. Both sides were so keenly contested that the judges encountered considerable difficulty in deciding the winner. However, the affirmative won the decision. A five minutes humorous entertainment was given by Douglas Smith. A song by four girls.

The meeting closed by singing the National Anthem.

Former Chinook Girl Designs Float For Festival

The float which will represent Whatcom High school at the Bellingham Tulip festival has been designed by a Vancouver girl, Miss Leola Brownell, daughter of Mr. and Mrs. C. R. Brownell, it is announced. Miss Brownell is finishing her senior year at Whatcom High school.

A description of the float pictures a huge tiger, stretched in a lying position between two very large vases filled with tiger lilies. Attached to the tiger are two golden cords which are held by the queen, who is seated on a platform at the back of the float. Above the queen is a tiger lily of considerable size, which serves as a canopy. The queen's two attendants stand at each side.

Chinook old-timers will remember Mr. and Mrs. C. R. Brownell and family, when Mr. Brownell was proprietor of a garage here. Mr. C. R. Brownell of Vancouver is a brother of Mr. W. E. Brownell.

There are two times in a man's life when he should not speculate; When he can't afford it, and when he can.—Mark Twain.

Local Member Asks For High School in Rural Districts

After many week of discussion on the various problems of the province by the members of the legislature, the member for Acadia has been able to voice an appeal on behalf of his constituency in the Alberta Legislature. Last week Mr. Proudfoot brought before the legislature the need of High School in rural parts of Alberta. He strongly urged that the Youngstown School of Agriculture which is now closed be opened as a regular high school with a distinct leaning towards agriculture.

The Acadia member also suggested to the Minister of Agriculture that an Agricultural Agent be located at Youngstown in order that the farmer of this district may be assisted and encouraged to go more into mixed farming.

Plenty of Farm Help Available

The local station agent has been advised by the Colonization Department that there are three thousand laborers available for farm work in the three western provinces. Any farmer in the Chinook district needing farm help may secure men by applying to O. B. Elliott, Chinook.

The Chinook ladies card club met at the home of Mrs. R. Vanhook on Tuesday evening. Mrs. F. Tracy and Mrs. Harry Smith were the lucky winners of the prizes. The club will meet next Tuesday evening at the home of Mrs. Tracy.

Coming to Chinook School next Wednesday evening, April 6th, the picture entitled "The Eagle of the Sea." Show starts at 8.15.

R. A. Lundy, Superintendent of the National Elevator Company, was in town yesterday.

A feature of the Edmonton Exhibition this year will be another historical pageant, commemorating the diamond jubilee of the Dominion.

OLD AGE PENSION BILL APPROVED BY SENATE

OTTAWA—The government's old age pension bill was given third reading in the senate on Thursday without amendment. It now awaits royal assent. Rapid progress was made with the bill during its latter stages in the upper house.

The bill provides for a maximum pension of \$240 yearly for British subjects who have attained the age of 70 years and been resident in Canada for 20 years provided that the recipient of the pension is not in receipt of as much private income as \$365 a year.

The provinces and the federal government are each to contribute one half of the amount required to maintain the pension, and the province is in charge of the administration of the act.

As it stands, the bill will remain on the federal statute books waiting the decision of any of the provinces which choose to make it effective within their boundaries.

What Is Success

It's doing your job the best you can
 And being just to your fellow-man;
 It's making money, but holding friends,
 And staying true to your aims and ends;
 It's figuring how and learning why,
 And looking forward and thinking high
 And dreaming a little and doing much;
 It's keeping always in closest touch
 With what is finest in word and deed;
 It's being thorough, yet making speed;
 It's struggling on with the will to win,
 But taking loss with a cheerful grin;
 It's sharing sorrow, and work, and mirth,
 And making better this good old earth;
 It's serving, striving through strain and stress;
 It's doing your noblest—that's Success.

—E. G. Barclay.

Teacher: "Johnny, why should we always tell the truth?"
 Johnny: "Because then we don't hafta remember what we say."

Flourishing Immigration Prospects

Pictures 1-4—Typical examples of juvenile type of immigrants to Canada. No. 4 shows 7 children who arrived alone recently. 2. Immigrants crowding the decks for a first glimpse of Canadian shores. 3. Sturdy settlers for the Dominion.

The active immigration season of 1927 has just opened will see, according to authoritative information given out by the Department of Colonization and Development of the Canadian Pacific Railway, the largest and most effective addition to Canadian population of any similar period since the outbreak of the Great War. In the opinion of authorities it is not unreasonable for the Dominion to expect over 500,000 new citizens, or about 70,000 more than during the year 1926. During this year Canada received 156,884 settlers.

Several factors tend towards this promised increase, of which one of the most potent is the gradual evolution of systems and a development of new machinery that has made the organization well nigh perfect. Further reductions in ocean and rail rates from the British Isles have induced considerable numbers to submit to the examinations for acceptance under the cheap passage. Applications at the rate of several a day are being received, it is reported. Already

this year well over 3,000 settlers have been landed in Canada by the Canadian Pacific liners plying between this country and the Motherland. It is interesting to note that about sixty per cent of the applicants are miners and others who have some knowledge of and experience at farm work.

The volume of pertinent inquiries from United States Agriculturists with regard to western Canadian farming prospects, has been much heavier this year than for some years, is the report. This is regarded as a most reliable index to the trend of the movement. A new and significant movement to develop however is that of tobacco growers from North and South Carolina, Virginia and other states to Western Ontario, being attracted by the rosy prospects now facing the Canadian tobacco growing industry.

Though land settlement conditions have drastically changed and the tendency is to place newcomers on vacant lands within reasonable distance of the railways, it was pointed out that it was a mistake to consider that homesteading is altogether a thing of the past as a factor of western Canadian development. During the year 1926 homestead occupations in the west amounted to an increase of 60 per cent over the occupations for the previous year, and accounted for the occupation of nearly a million acres of raw land. This movement in continuing as is evident in the figures of filings in January 1927 which were 32 per cent more than those of the same month of the previous year.

The most significant factor today, it was pointed out, is the local colonization board, through which the general interest in immigration and colonization takes practical shape under the direction of the railways. About 150 similar boards now exist in western Canada.

Juvenile immigration, the importance of which is being increasingly realized in recent years, promises to be very heavy during the year 1927, all of which is being directed towards the land.

A Creamery's Greatest Assets Are Its Cream Patrons

Many features about the Creamery business are very important. It is necessary to have good equipment and efficient employees, plus a good market for the finished product.

More important than all these, however, are our Cream Patrons. We have to depend on You Mr. Cream Shipper, for our cream. To a great extent the quality of our products depends on the quality of the Cream You produce, and the care You take of it.

We want Cream, more Cream, and better Cream, if possible in return for which you can absolutely count on best grade, service and price when you ship your cream to—
